Homework

Friday 13th November 2026

Maths

In Maths this week we have been using our number facts within ten to solve problems.

If we know

4 + 2 = 6

We also know

14 + 2 =16

24 + 2 = 26

We know this because the 'ones' digits stay the same and we add and 'ten' each time.

Can you use this number fact to record more equations that belong with the number facts?

Maybe you could use a different set of number facts to solve a different set of equations.

Challenge – Can you apply the same knowledge to subtraction facts?

Christmas

We've been brave this week, and launched our Christmas play!

Your child has a costume letter in their bookbag, and also their lines (if they have any to learn). The costumes need to be in a named bag. Please give to your child's teacher/TA by Friday 27th November.

If your child has lines, please practise these at home as it will give them lots of confidence to enjoy the play. We will be practising in school only twice a week.

Thank you.
