

FAMILY

We are going to be finding out all about our families. Every family is different and you are going to find out just how special your family is!

Who lives in your house? How many adults? How many children?

Can you sort everyone into height order? Who is the tallest and shortest?

Is the tallest person the oldest?

Draw round everyone's hands. Cut the hands out. Can you use them to count in 5s?

Draw round everyone's feet. Cut the feet out. Can you use them to measure objects in your house? Try and estimate how many first.

You can choose how to record what you find out. You could take a photo. We would love to know what you have found out.
